### COURSE OBJECTIVES

This 42-hour training program is designed for students willing to learn the basics of Spanish vocabulary, pronunciation, and grammar. It's also a great opportunity to explore the culture behind the Spanish language. This is a student-centered program with focus on the development of communicational skills for simple contexts of language.

This course is ideal for adult learners who wish to start acquiring Spanish as a second language in a highly engaging and challenging setting, where no time is wasted. You will even speak Spanish during your coffee break!

Our highly qualified instructors will speak in Spanish most of the time, helping the students, in this way, to develop better listening comprehension skills and real time interaction in the target language.

By the end of this course, students will have developed the following skills:

- Develop basic competence in oral and written comprehension and expression of the Spanish language, giving and responding to simple information that satisfies their immediate needs. Handle everyday situations, understanding simple questions spoken at below-normal speed and giving opinions using basic vocabulary.
- Get familiar with both regular and irregular verbs in the present and basic past tenses.
- Learn vocabulary related to a range of different personal and social topics.
